

DATA PROTECTION AND PRIVACY POLICY

The information gathered from users of this web-site can be received by the following means:

- Information provided by the user themselves using contact addresses (e-mail)
- Registration processes for certain services offered on the web-site

The personal ID information will be exclusively used to reply to your requests and offer you information on the Sociedad Española de Frenos, Calefacción y Señales, S.A., except in those cases where other ends exist and your express and specific consent is obtained for this.

Some of the services we provide might be based on registration, in which personal information will be requested. The data that you provide will be used exclusively to offer you information services within the ambit they were requested for, it being possible to update the registration data should you not wish to receive further information or wish to change its content.

Sociedad Española de Frenos, Calefacción y Señales, S.A. processes the personal information in strict compliance with personal data-related legislation, in particular Organic Law 15/1999 regarding Personal Data Protection and later regulatory developments.

In this regard all personal data collated will be added to files registered in the General Data Protection Record in the name of Sociedad Española de Frenos, Calefacción y Señales, S.A. in compliance with all established obligations, especially those relating to adhering to the principles of dissemination and consent.

In keeping with the Security Measure Regulations, Sociedad Española de Frenos, Calefacción y Señales, S.A. also has established technological and operational security policies and procedures to protect your personal information against loss, misuse, modification or unintentional destruction and at all times safeguards its confidentiality.

This is all without detriment to the exercise of your rights to access, rectify, cancel and contest under the terms laid down under prevailing legislation by writing to:
